(54) Title: ARRANGEMENT AND METHOD FOR MANUFACTURING PET BOTTLE WITH HANDLE FORMED AT BODY PART BY INJECTION BLOW MOLDING, AND PET BOTTLE MANUFACTURED BY THEM

(57) Abstract: The present invention relates to arrangement and method for manufacturing a PET bottle having a handle formed on a body by a continuous process by means of an injection blow molding method, and a PET bottle manufactured thereby. The method comprises the steps of performing a first blowing operation to blow compressed air into a preform manufactured by injection molding after mounting the preform to a preform blow mold, performing a second blowing operation to blow compressed air into the first PET container after mounting the first PET container to a blow mold having a handle forming portion, cutting off a compressed portion of the handle section of the second PET container, and bonding a cut-off portion of the handle section of the third PET container remaining after the step c).
